CASEL - The Collaborative for Academic, Social, and Emotional Learning (SEL)

Below is a Partial Network of CASEL's Supporters

Social Emotional Learning (SEL) is a highly effective, widely used, sophisticated psychological tool for transformation. SEL is functionally a system that merges into every component of each education provider. It is applied to each student to alter their attitudes, values, and beliefs. It changes the student's and school personnel's perception filters, effectively implanting a Marxist worldview. Everything is taught through the lens of SEL to achieve social justice and equity. It is anti-God, and anti-family.
